Limousine Association of New Jersey

LANJ Recommends Deem As Technology Provider for Operators

The Limousine Association of New Jersey has announced that it recommends Deem Car Service as a technology provider for its operator members.

According to the Deem press release published on October 27, 2015, "Deem is leveraging its \$200 million investment in its one-of-a-kind cloud and mobile platform to deliver a highly-scalable real-time network and mobile application, effectively leveling the technology playing field against the new class of transportation network companies (TNCs).

"The cloud network and mobile application will optimize operations and maximize fleet utilization for chauffeured transportation operators, provide advance reservations and ride-hailing services for corporations and customers alike, substantially enhance customer care and safety, and most importantly, customer privacy and data security."
