Limousine Association of New Jersey

E-News

July 14, 2020

The Limousine Association of New Jersey E-News is published on the second and fourth Tuesdays of each month expressly for the organization's members.

NLA Registers Industry Support for Legislation Forgiving PPP Loans of Less Than \$150,000

The National Limousine Association (NLA), of which the Limousine Association of New Jersey is a member, has joined more than 100 other trade associations representing thousands of small businesses to support S. 4117, the **Paycheck Protection Program Small Business Forgiveness Act**.

As described in a July 9, 2020 letter sent to the chairs and ranking members of the U.S. Senate Committee on Small Business & Entrepreneurship and the U.S. House of Representatives Committee on Small Business, the trade associations "urge Congress to quickly pass this legislation that would forgive PPP loans of less than \$150,000 upon the borrower's completion of a simple, one-page forgiveness document."

The letter further explains that "PPP loans of \$150,000 and under account for 85 percent of total PPP recipients, but less than 27 percent of PPP loan dollars. Expediting the loan forgiveness process for many...hard-hit businesses will save more than \$7 billion dollars and hours of paperwork."

**New Company Offers
Sanitizing Solution for
Chauffeured Transportation**

Vehicles of All Sizes

In response to the safety challenges COVID-19 has presented to chauffeured transportation operators, a new company **PuraArmor** now offers an all-in-one package that can sanitize vehicles of all sizes.

As described on the company's [website](#), "The package includes the EMist EPIX360 handheld electrostatic sprayer, which is cordless; requires only one person for application; can cover any size vehicle in just minutes; and is made in the U.S.

"PuraArmor pairs the sprayer with HydroLyte disinfectant, a non-toxic salt solution called hypochlorous acid that has been used safely in high-trafficked areas such as hospitals, firehouses, schools, and transit hubs for decades. The electrostatic process releases tiny droplets (75 microns) that bind to each other and coat surfaces like an armor to kill germs, fungi, and viruses in minutes. The unit is about the size of a cordless drill and weighs four pounds when the eight-ounce tank is full."

The PuraArmor enterprise was founded by chauffeured transportation veterans **Shawn Glasgow** of Peak Limousine (Charlotte, N.C.) and **Eric Devlin** of Premier Transportation (Dallas, Tex.) and industry sales professional **Brian O'Neill**.

Says O'Neill, "It's about giving customers peace of mind that the vehicle was germ-free prior to them getting in. This is a product that applies to the masses, including residential applications, because it's safe to use around anyone."

For more information on PuraArmor and its products, see www.PuraArmor.com.
